

SPECIAL OFFER  
GYNECOLOGISTS

Friday July 21 - From 9:30 AM to 7 PM

## BALI INTERNATIONAL CONVENTION CENTER

The Westin Resort - Nusa Dua - Bali, INDONESIA

# IMCAS ASIA 2017 VULVOVAGINAL MODULE PASS

**D**esigned in collaboration with the prestigious learned societies of the Research and Innovation Group in Genital Restoration (GRIRG) and the European Society of Aesthetic Gynecology (ESAG), the Genital Treatment module is composed of six intensive sessions, providing not only gynecologists, but also other physicians, with a thorough and in depth understanding of the different treatments available for this intimate area.

Physicians will discover a variety of vaginal rejuvenation methods, ranging from surgery to minimally invasive and non-surgical treatment options.

Surgical techniques will include labiaplasty and vaginal tightening using threads and microfat and nanofat, while the minimally invasive and non-surgical treatment sessions will cover the role of lasers, threads and injectables.

The module also includes a live dissection from the Anatomy on Cadaver Workshop and corresponding video treatment demonstrations.

This will be linked to an IMCAS Academy webinar session focusing on injections and EBDs in the feminine intimate zone, where physicians from all over the world will be able to join and ask their questions live.

And of course we must not forget the men. A targeted penoplasty course will discuss surgical penoplasty and penile augmentation with hyaluronic acid.

In each session there will be an opportunity for questions and answers in order for the physicians to directly benefit from the expertise of the speakers.

## PROGRAM
